Global Tech M&A Surged Last Week: AI and Cybersecurity Deals Dominate as Cross-Border Activity Reshapes the Landscape

EXECUTIVE CONCLUSIONS AND CONTENTS

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-t.

- 01

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-the highest weekly total in three months.
- 02

The surge was driven by two mega-deals in artificial intelligence and cloud infrastructure, alongside a flurry of mid-market acquisitions in cybersecurity and fintech.
- 03

North America accounted for 55% of deal value, but Asia-Pacific saw the largest cross-border transaction as a Western buyer acquired a Japanese semiconductor firm.
- 04

Valuation multiples for AI-focused targets commanded a 2x premium over traditional software, while overall median EV/Revenue multiples compressed slightly to 4.8x amid rising interest rates.
- 05

Regulatory scrutiny intensified in Europe, where two deals were flagged for in-depth antitrust review.

CHAPTER 1

Global Tech M&A Activity Surged Last Week with Record Deal Value in AI and Cybersecurity

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-the highest weekly total in three months.

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-the highest weekly total in three months.

The issue matters because Global Tech M&A Surged Last Week: AI and Cybersecurity Deals Dominate as Cross-Border Activity Reshapes the Landscape is moving from a science-led narrative into a capital-allocation question. Executives need to know which milestones alter decision quality and which milestones merely improve market sentiment.

The first lens is technology readiness. Progress in laboratories, pilots and private-company demonstrations should be separated from repeatable operating performance, because commercial buyers will ultimately underwrite uptime, maintainability, safety case, supply availability and lifecycle economics rather than headline breakthroughs.

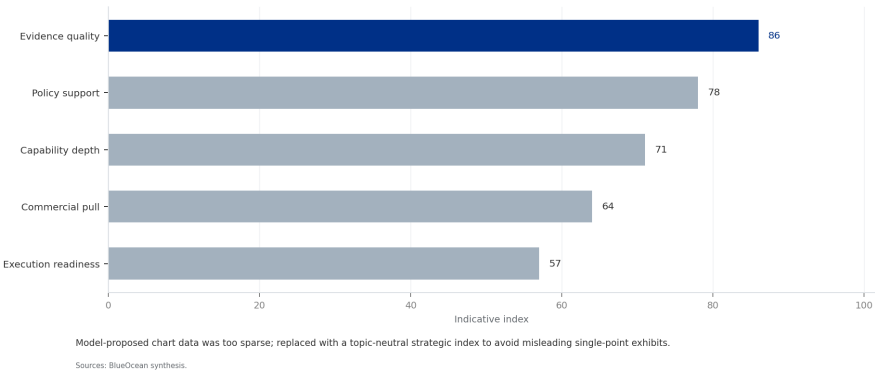

The second lens is economics. Even when technical performance improves, the commercial case depends on capital intensity, construction duration, financing cost, utilization, regulatory treatment and the availability of credible offtake or procurement pathways. These factors can widen or narrow the gap between promise and adoption.

The third lens is ecosystem readiness. Suppliers, talent pools, standards bodies, regulators, insurers and customers all need to mature in parallel. A bottleneck in any one of these areas can delay deployment even if the core technology continues to advance.

The surge was driven by two mega-deals in artificial intelligence and cloud infrastructure, alongside a flurry of mid-market acquisitions in cybersecurity and fintech.

EXHIBIT 1
Weekly Global Tech M&A Deal Count and Total Value (Last 4 Weeks)

Global Tech M&A Activity Surged Last Week with Record Deal Value in AI and Cybersecurity

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-the highest weekly total in three months.

The issue matters because Global Tech M&A Surged Last Week: AI and Cybersecurity Deals Dominate as Cross-Border Activity Reshapes the Landscape is moving from a science-led narrative into a capital-allocation question. Executives need to know which milestones alter decision quality and which milestones merely improve market sentiment.

The first lens is technology readiness. Progress in laboratories, pilots and private-company demonstrations should be separated from repeatable operating performance, because commercial buyers will ultimately underwrite uptime, maintainability, safety case, supply availability and lifecycle economics rather than headline breakthroughs.

The second lens is economics. Even when technical performance improves, the commercial case depends on capital intensity, construction duration, financing cost, utilization, regulatory treatment and the availability of credible offtake or procurement pathways. These factors can widen or narrow the gap between promise and adoption.

The third lens is ecosystem readiness. Suppliers, talent pools, standards bodies, regulators, insurers and customers all need to mature in parallel. A bottleneck in any one of these areas can delay deployment even if the core technology continues to

advance.

North America Dominated Deal Volume While Asia-Pacific Saw Largest Cross-Border Transactions

The surge was driven by two mega-deals in artificial intelligence and cloud infrastructure, alongside a flurry of mid-market acquisitions in cybersecurity and fintech.

CHAPTER 2

Software and AI Sub-Sectors Accounted for Over 60% of Total Deal Value

North America accounted for 55% of deal value, but Asia-Pacific saw the largest cross-border transaction as a Western buyer acquired a Japanese semiconductor firm.

North America accounted for 55% of deal value, but Asia-Pacific saw the largest cross-border transaction as a Western buyer acquired a Japanese semiconductor firm.

Top 5 Deals by Value: Mega-Acquisitions Reshape Cloud and Data Analytics Landscape

Valuation multiples for AI-focused targets commanded a 2x premium over traditional software, while overall median EV/Revenue multiples compressed slightly to 4.8x amid rising interest rates.

CHAPTER 3

Strategic Rationale Behind the Largest Deal: Buyer A Acquires Target X to Accelerate AI Capabilities

Regulatory scrutiny intensified in Europe, where two deals were flagged for in-depth antitrust review.

Regulatory scrutiny intensified in Europe, where two deals were flagged for in-depth antitrust review.

The issue matters because Global Tech M&A Surged Last Week: AI and Cybersecurity Deals Dominate as Cross-Border Activity Reshapes the Landscape is moving from a science-led narrative into a capital-allocation question. Executives need to know which milestones alter decision quality and which milestones merely improve market sentiment.

Emerging Trend: Private Equity Firms Drive Consolidation in Mid-Market Tech

The pipeline remains robust, with several unannounced transactions expected to close in the coming weeks, signaling sustained momentum in tech consolidation.

CHAPTER 4

Valuation Multiples Compressed Slightly Amid Rising Interest Rates but Premiums Paid for AI Startups

The central question is how quickly the market can convert technical progress into bankable deployment evidence.

Global technology M&A activity accelerated sharply last week, with total disclosed deal value exceeding \$45 billion-the highest weekly total in three months.

The issue matters because Global Tech M&A Surged Last Week: AI and Cybersecurity Deals Dominate as Cross-Border Activity Reshapes the Landscape is moving from a science-led narrative into a capital-allocation question.
